

KI verwandelt Arbeit in Software

Eine Neuausrichtung für Top-Manager

Manuel Yoon, Expert for AI and Autonomous Systems

What's to come in AI?

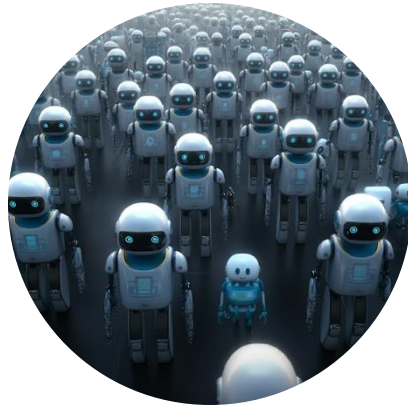

LLM+

Multi-modal,
Reasoning

2024

Agents
Task
autonomy

2025

**Embodied AI/
Physical AI**
From Screen to
spatial world

2026

AGI emergence
New discoveries

2028+

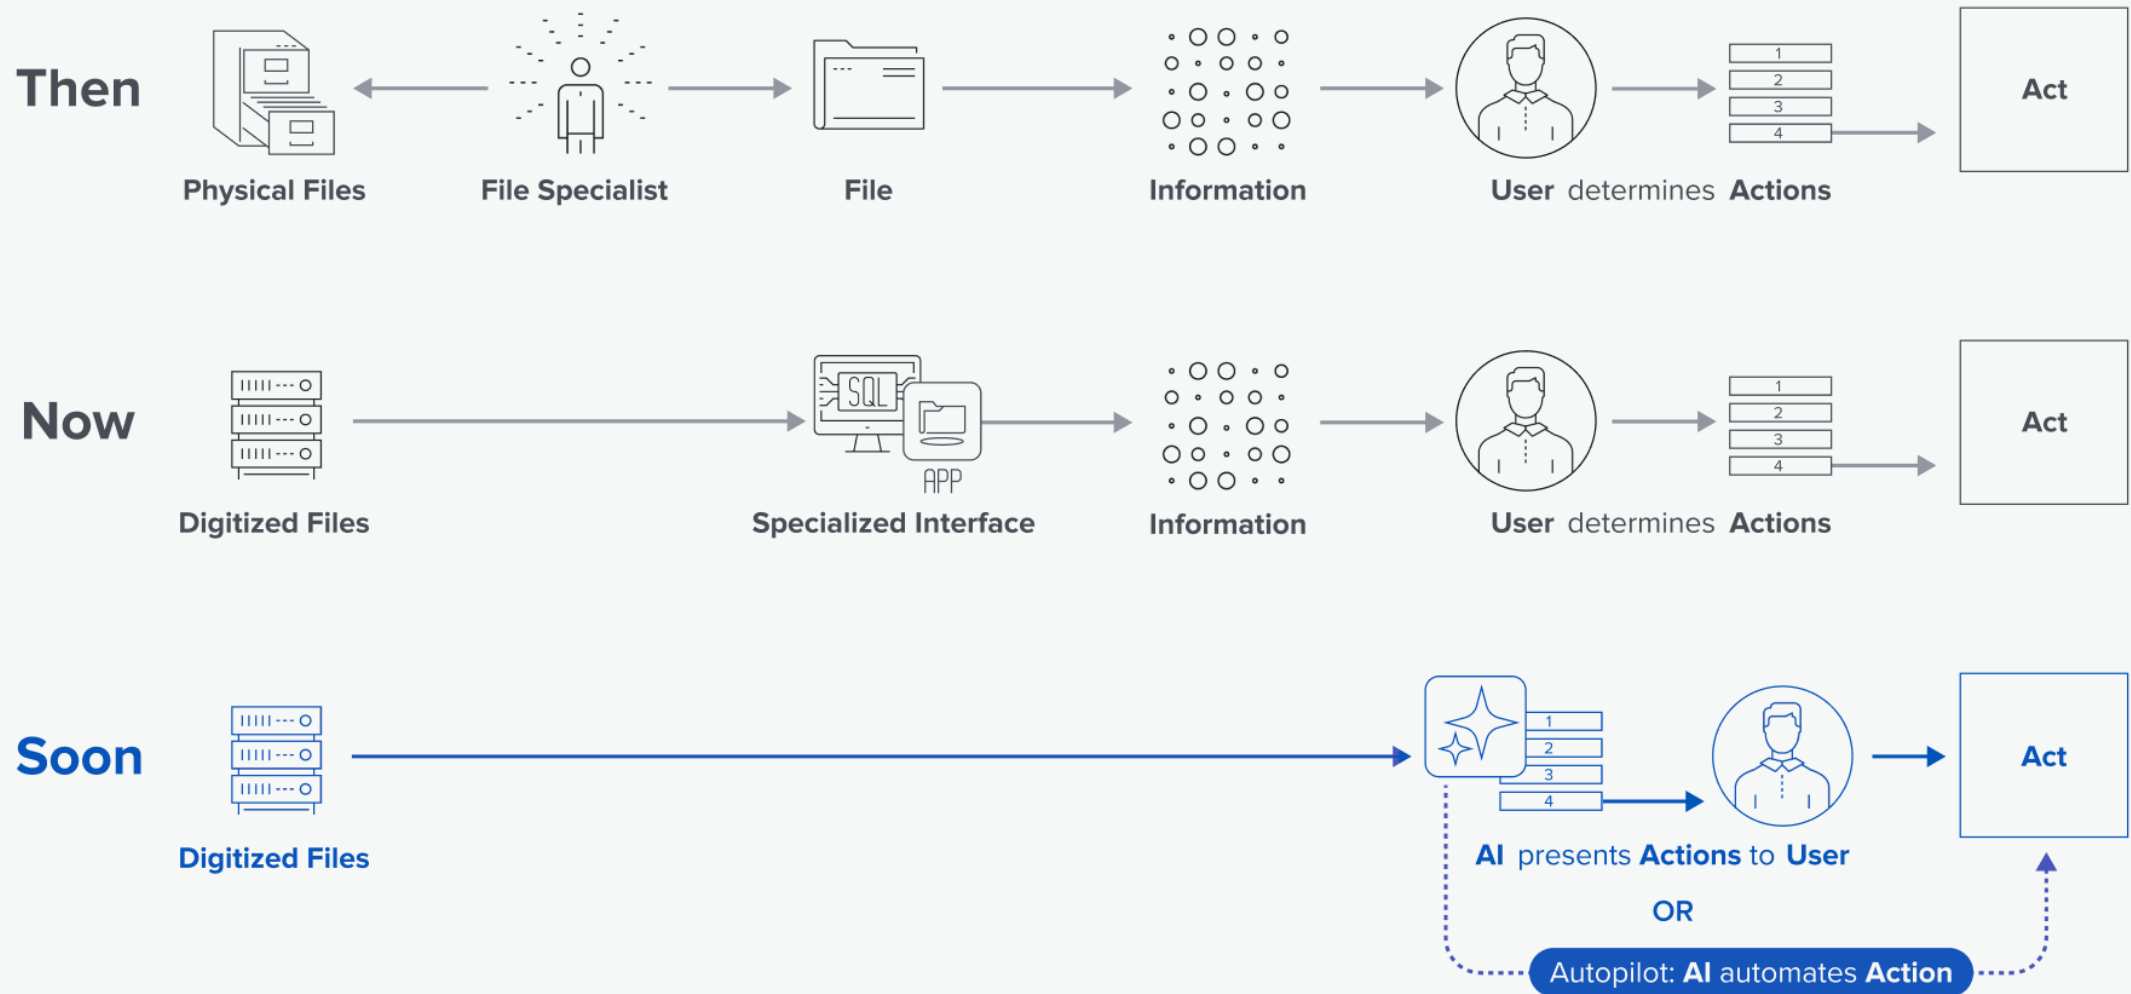

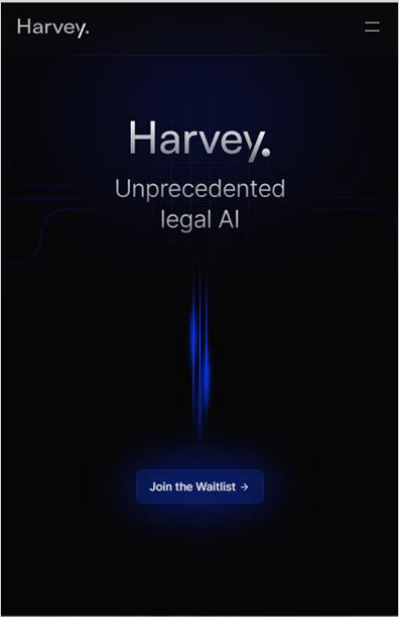

LLM-> LAM: Age of agents

“I’m hoping that Nvidia will one day become a 50,000 employee company with **100 million AI assistants**”

Jensen Huang, Nvidia CEO
BG2 podcast, Oct. 2024

Physical → Digital → AI

VS.

Meet Harvey, your personal AI lawyer

Save thousands on a lawyer with Harvey. He's read every law book there is, scored in the top 10% of lawyers on the Bar, and knows the answer to any legal question you have.

SO WHAT?

Cloud enabled Software-as-a-service (SaaS)

AI turns labor into software ("Work AI")

2010
\$350B Software Market
\$6B Cloud Software Market

2024
\$650B Software Market
\$400B Cloud Software Market

2024
\$10T+ Software and Services Market
\$3B AI Software Market

“It’s job transformation. Human jobs will be replaced — but will be replaced by other humans using AI. The whole idea is to be the human who is using AI, to learn it, to do it, to make it happen.”

Reid Hoffman, co-founder LinkedIn, VC

Lead with AI

Embrace AI as a new way to operate. Focus on how to apply AI to solve specific business problems

Rethink roles

Your job will be to guide and correct AI, achieving far greater leverage than you could with human labor alone

Build and partner

Invest in AI infrastructure and talent. Allocate resources to builders and partners to manage these AI systems
