

Radical Collaboration for Industrial Software in multi-sided Data Ecosystems

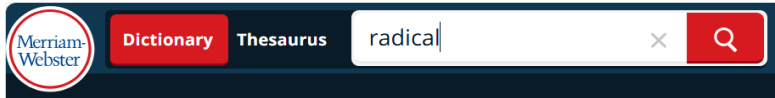

Dr. Jürgen Sturm | SVP Automotive Data Ecosystems | ZF Group

Stephan Bauer | Platform Domain Manager | Catena-X Association

Berlin, June 4 2025 | Conference | Transform or Face Disruption –
Executive Exchange on the Future of Corporate Software Production & AI

Intro - Radical Collaboration

radical | rad·i·cal

- 1) relating to, or proceeding from a **ROOT**
- 2) relating to the origin : **FUNDAMENTAL**
- 3) very different from the usual or traditional : **EXTREME**
- 4) slang : **EXCELLENT, COOL**

Copilot: **Radical collaboration** is a concept that emphasizes **deep, transformative cooperation among diverse groups** to achieve significant and impactful outcomes. Unlike traditional collaboration, which can often be transactional and limited in scope, radical collaboration **seeks to break down silos** and **foster genuine partnerships** based on **trust, transparency**, and **mutual respect**.

Key principles of radical collaboration include:

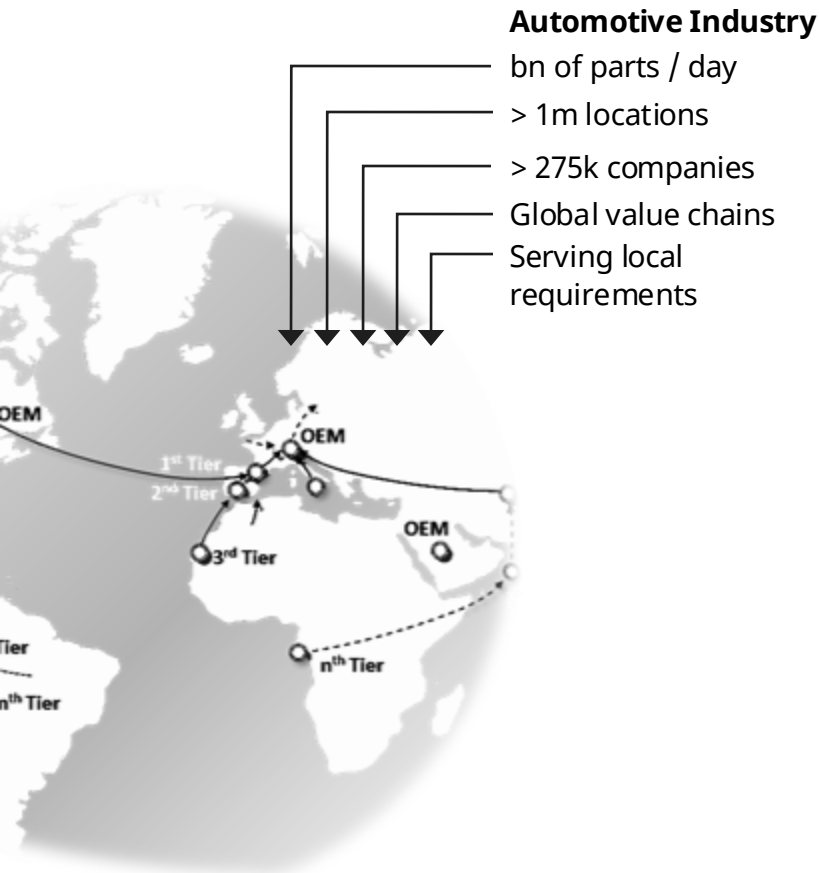

- **Diverse Perspectives:** Bringing together individuals from different backgrounds and disciplines to generate innovative solutions.
- **Openness** and **Trust:** Building relationships based on honesty and mutual respect.
- **Shared Goals:** Focusing on common objectives rather than individual agendas.
- **Continuous Learning:** Embracing new ideas and being willing to adapt and evolve.

This approach is particularly valuable in addressing **complex challenges**, such as those outlined in the United Nations Sustainable Development Goals (SDGs), **where no single organization can achieve the goals alone**.

Our automotive business processes require an update of the industry operating model

Motivation: “License to operate and grow”

Resiliency
Resilient Supply Chains

- Business Partner Identification
- Location Certification
- Bolster supply performance
- Optimize inventory / logistics
- ...

Compliance
Trusted Sustainability

- Report validated CO₂e-Values
- Cover regional variance
- Release of Product Passports
- Supply Chain Due Diligence
- ...

Cost down
Effective Quality

- Trace parts / campaign mgt.
- Live quality loops
- Behavior Twins
- ...

require

multi-tier collaboration along the value chain

It is a digital challenge!

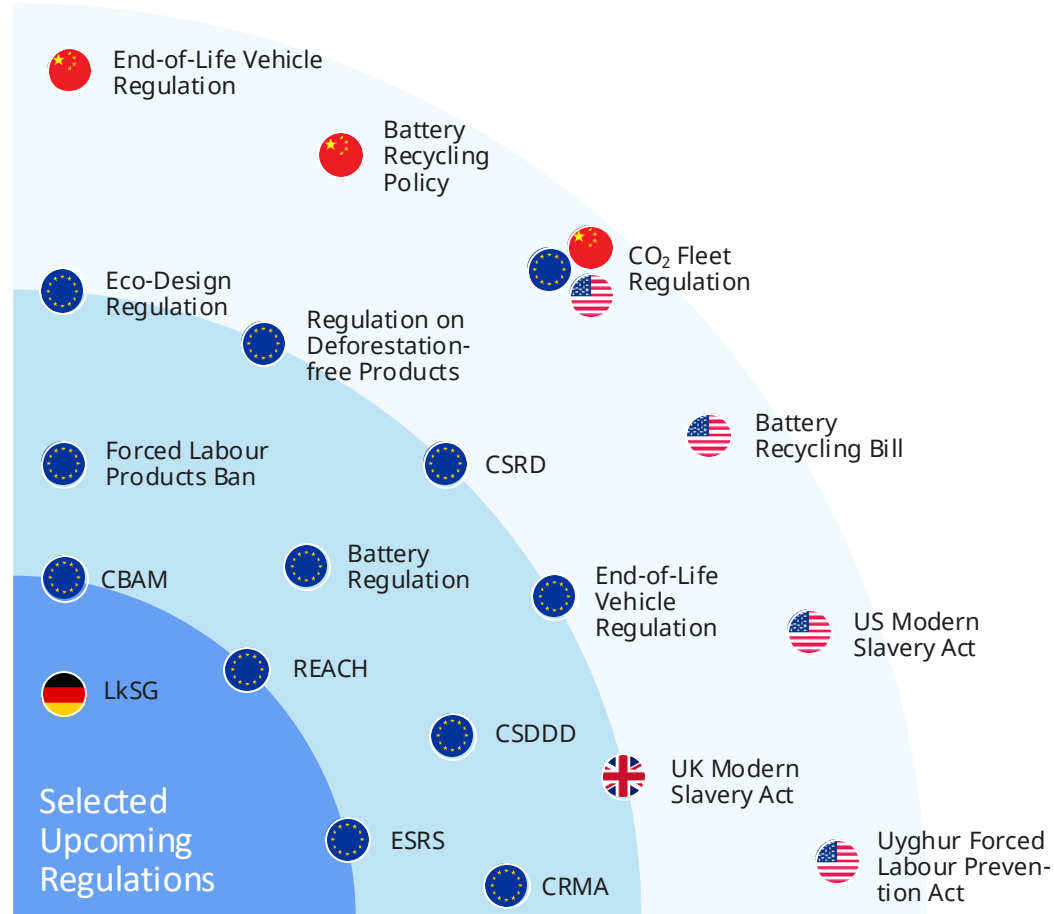

Mastering the worldwide regulatory tsunami

New level of reporting incl. regional variances will hit our industry hard, if we are not prepared to scale.

- One-time reporting
- Average values
- Discreet data point
- Reporting on secondary data
- Choose your own calculation method

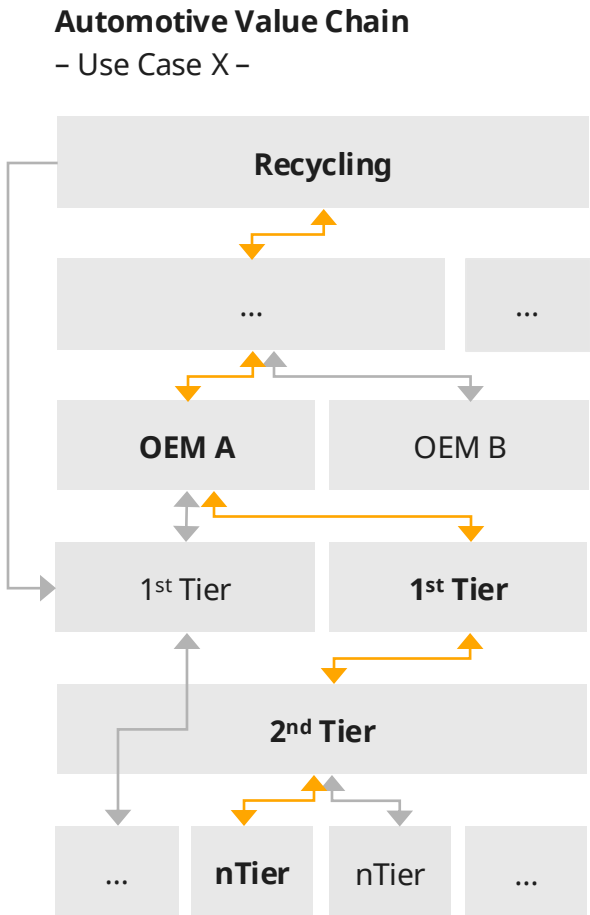

2030

- 1 Continuous Reporting of LCA
- 2 Third party Verification
- 3 Instance Level
- 4 Reasonable assurance
- 5 Different prescriptive methodologies
- 6 Sensitive data
- 7 Methodology depending on regulation and region

Four main alternatives

Alternative 1

1x central Data Base for all industry partners

- + No cost for supplier
- + Established / available
- Trust / Verification
- Data Protection / IP
- Cyber-Security
- Business Process Readiness

Alternative 2

One IT Provider for all partners of the same value chain

- + Trust / Verification
- + One solution provider
- Compliance / AntiTrust
- Scalability in Business
- Enforce Usage (nTier)
- Costs / Synergies

Alternative 3

Industry standards to create inter-operability between providers

- + Freedom of Choice (vendors) → Anti Trust
- + Data Protection / Cyber Security
- + Trust / Verification
- + Scalability in Business
- Industry Transformation
- Initial Complexity

Alternative 4

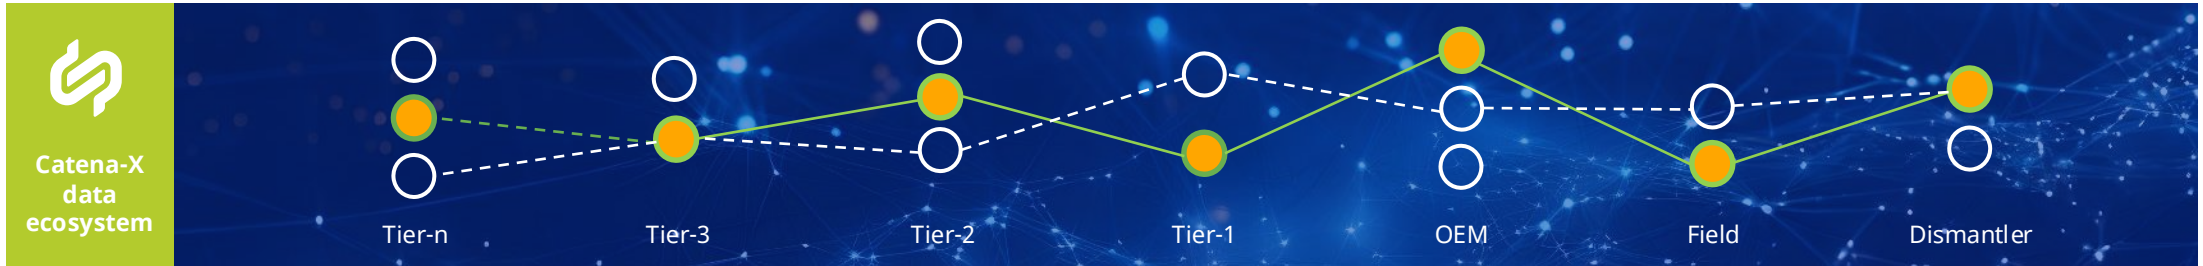

Every Partner has its own solution

- + Data Protection / IP
- + Freedom of Choice
- Trust / Verification
- Business Compliance
- Compatibility / Logic
- Scalability in Business
- Overall Costs

Catena-X developed an open, collaborative ecosystem for data exchange along the value chain

Trusted Identities

Verified and unique company identities

Self Sovereignty

Decentral Architecture with full control over your data

Interoperability

Unified open-source-based standards and KITs

Industry Governance

One global operating model and framework

Catena-X is **not a database** to store and collect data but an **open ecosystem** to share data in a better way – **standardized, secure and simple**.

Catena-X is more than “ONE” use case

21x synergetic KITs are here to optimize your value chain processes

KITs = Keep it together = Ecosystem Builders

Blueprint & foundation of each Business Solution

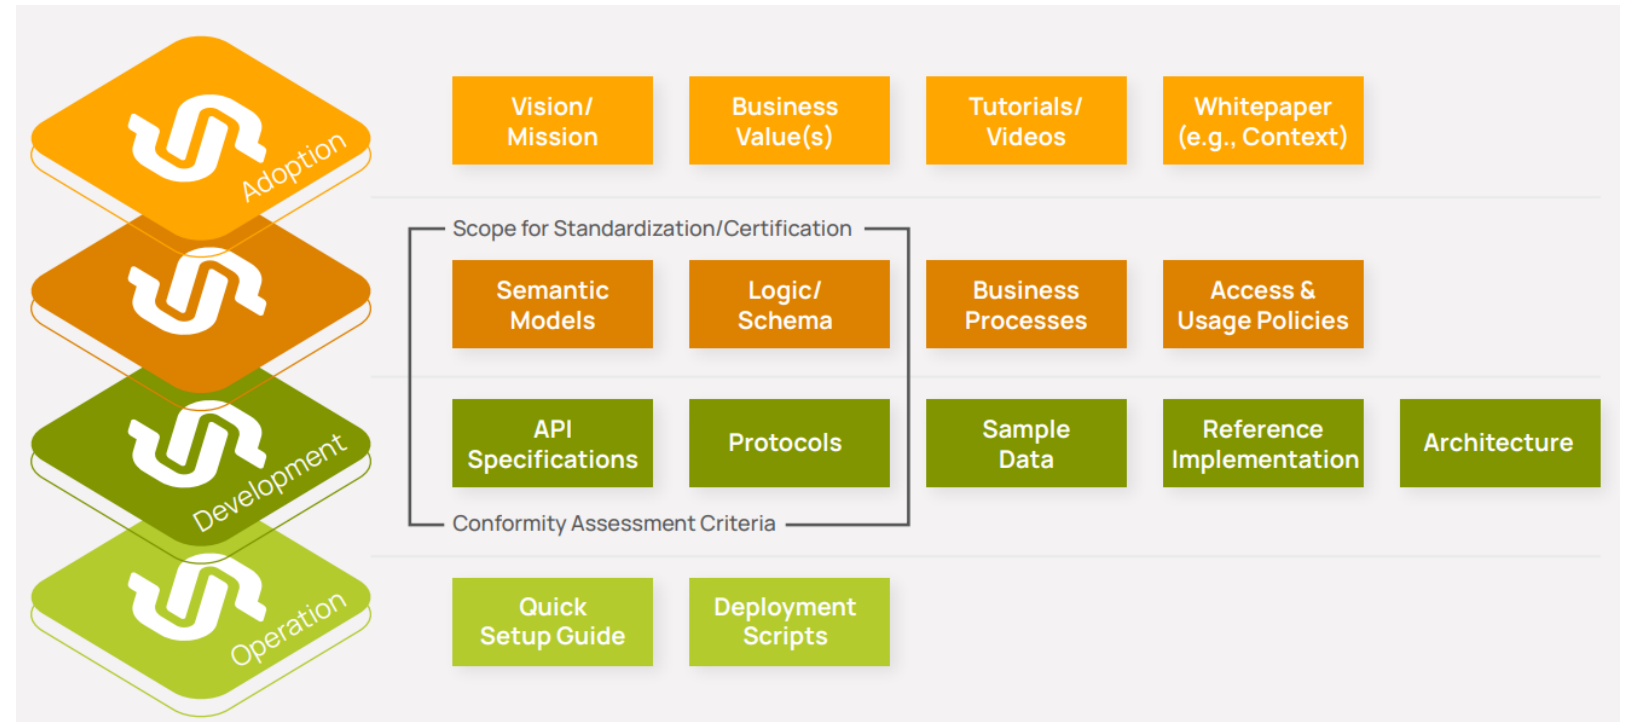

Standards

- Formal Documents
- Normative Clauses
- Specific Process

KITs

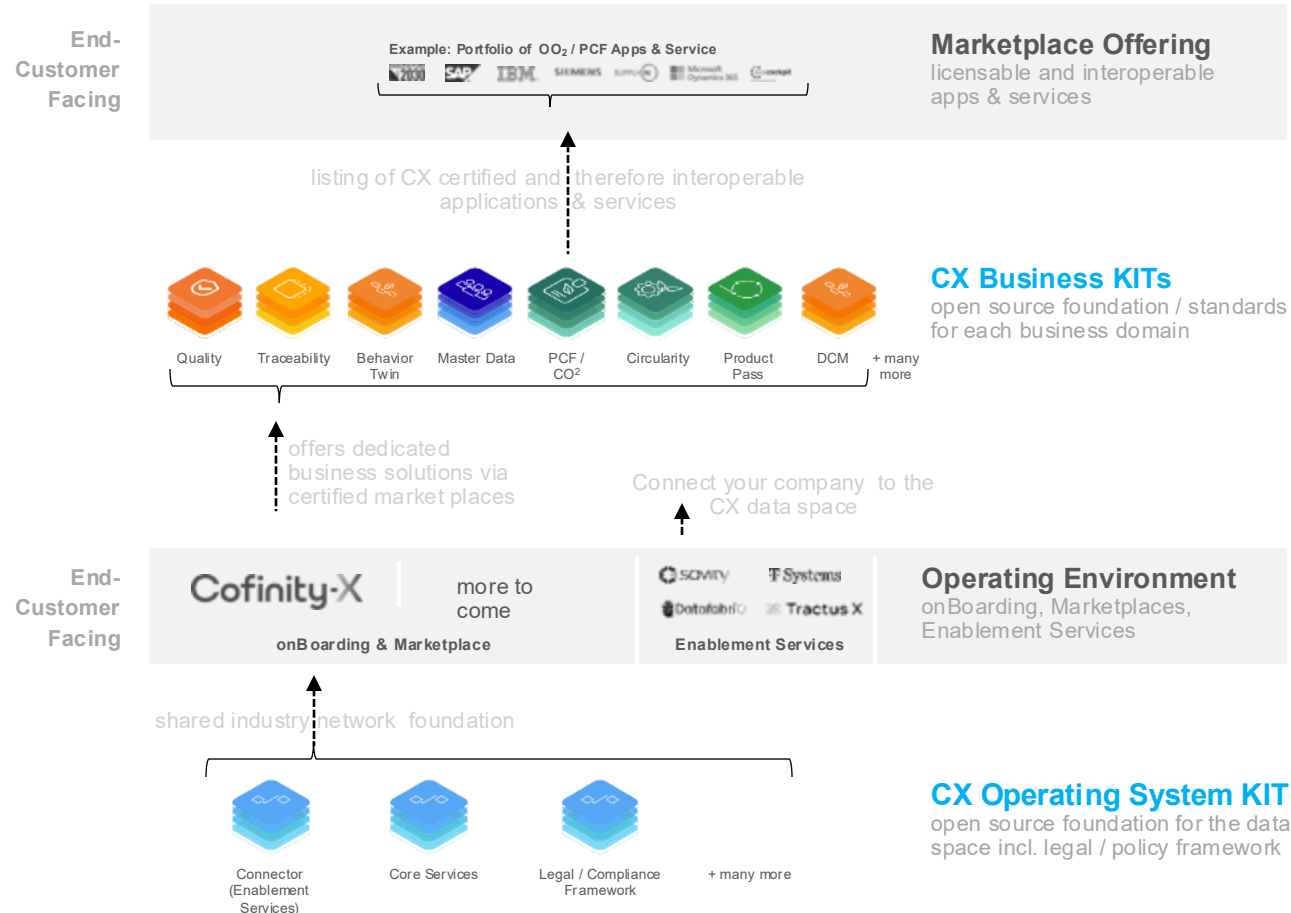

Publicly available under: <https://eclipse-tractusx.github.io/>

What we've created

CX KITs enable an interoperable multi vendor ecosystem.

Today's Structure

- **65x** Standards
- **21x** KITs
- **1x** Operating Model
- **1x** Gaia-X compliant Operating System
- **1x** Core Service Provider
- **1x** Legal / Policy Framework
- **1x** Conformity Assessment Body

TODAY

The 1st trusted multi-tier business collaboration network is LIVE

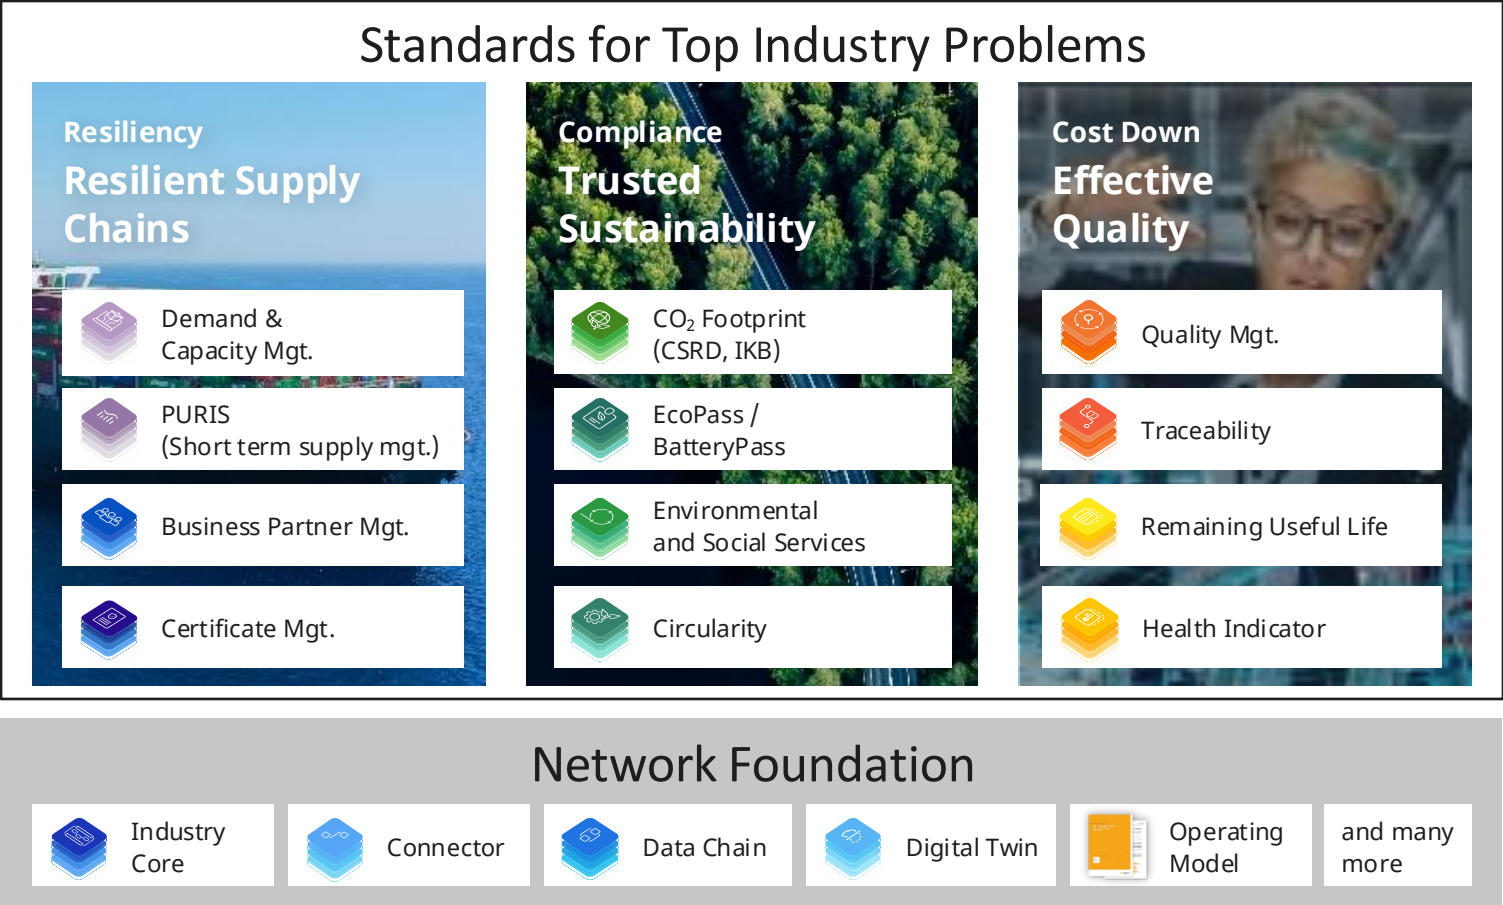

Trusted & interoperable data exchange: **Governed by the industry**

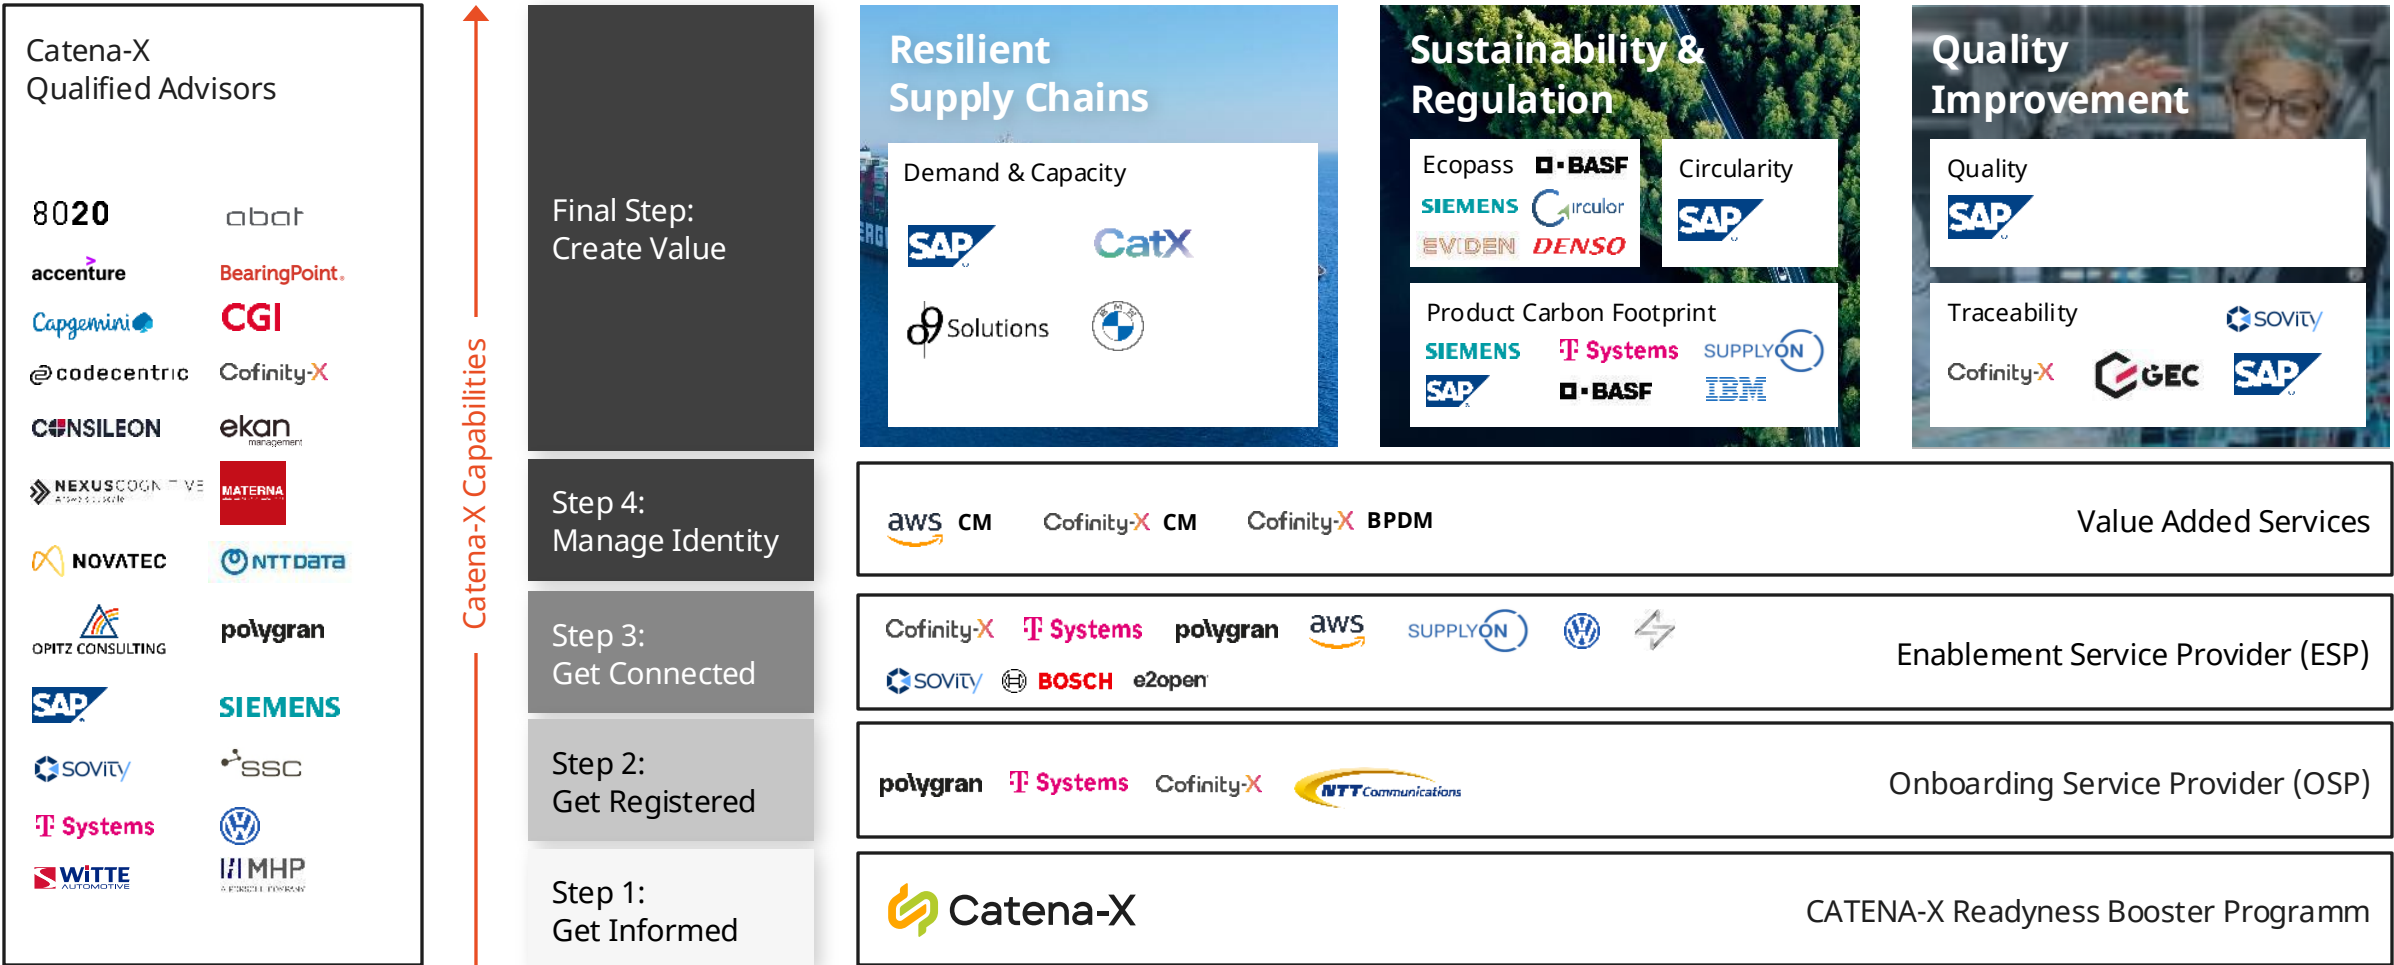

Catena-X results as of 12/2024:

- **Scalable / trusted standards for top industry problems** (21x KITs, >40 certified services)
- **Fully operational development** (Tractus-X) & **operating environment** (Cofinity-X)
- **Global and cross Industry Alignment** (US, EU, CN)
- **Conformity Assessment Body** (Deloitte / TÜV)

Catena-X Solution Portfolio

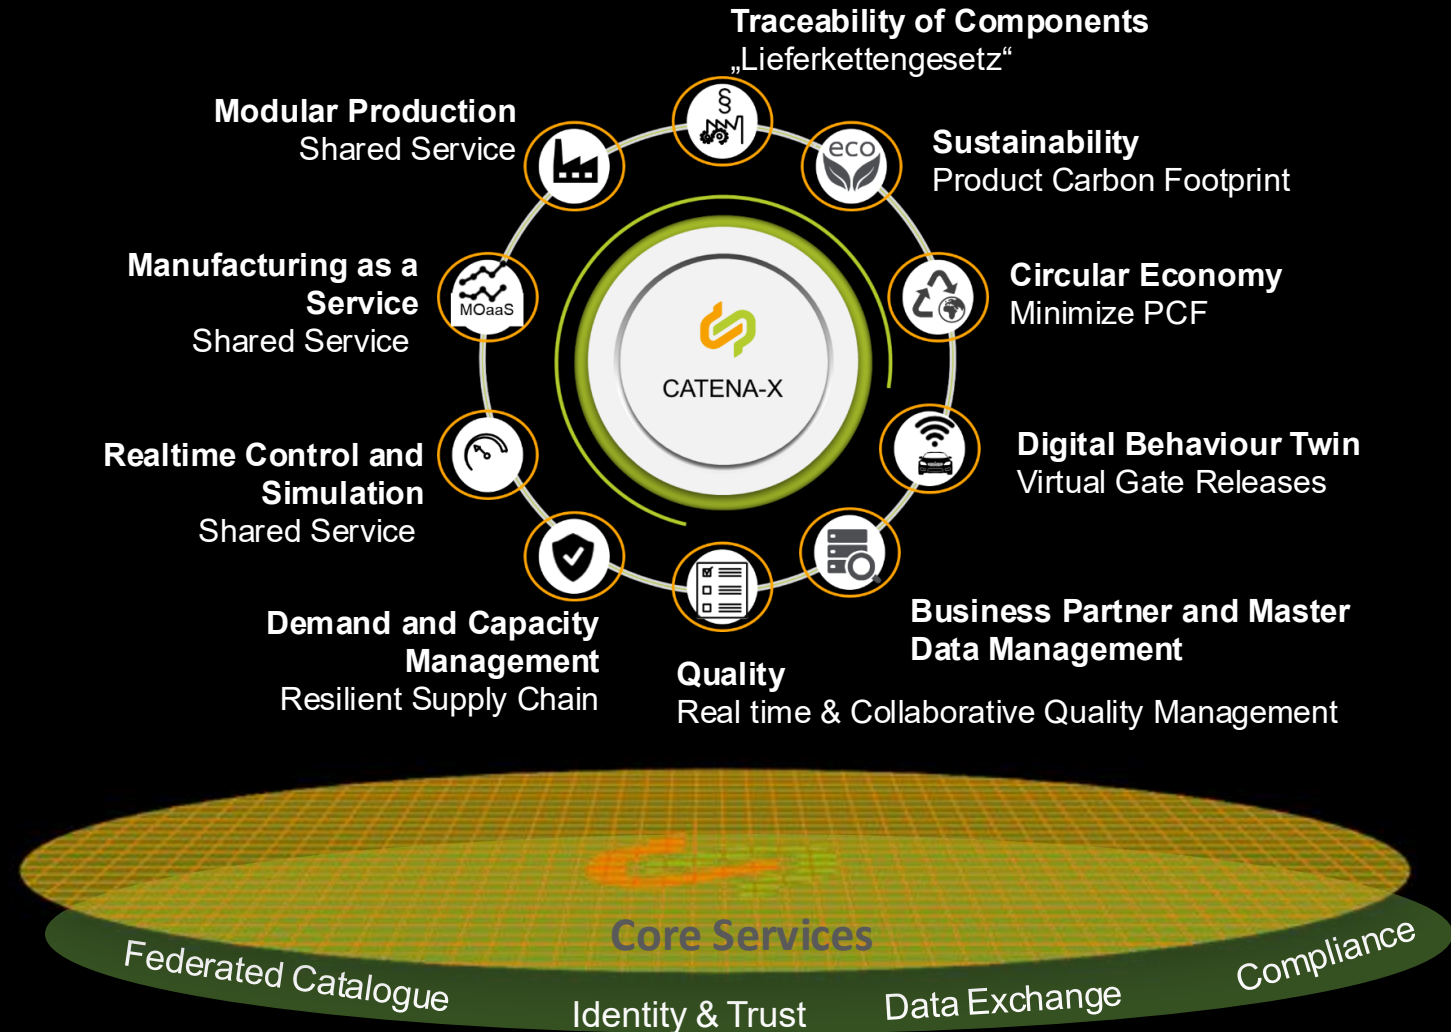

ZF contributed into C-X Core Services and Use Cases

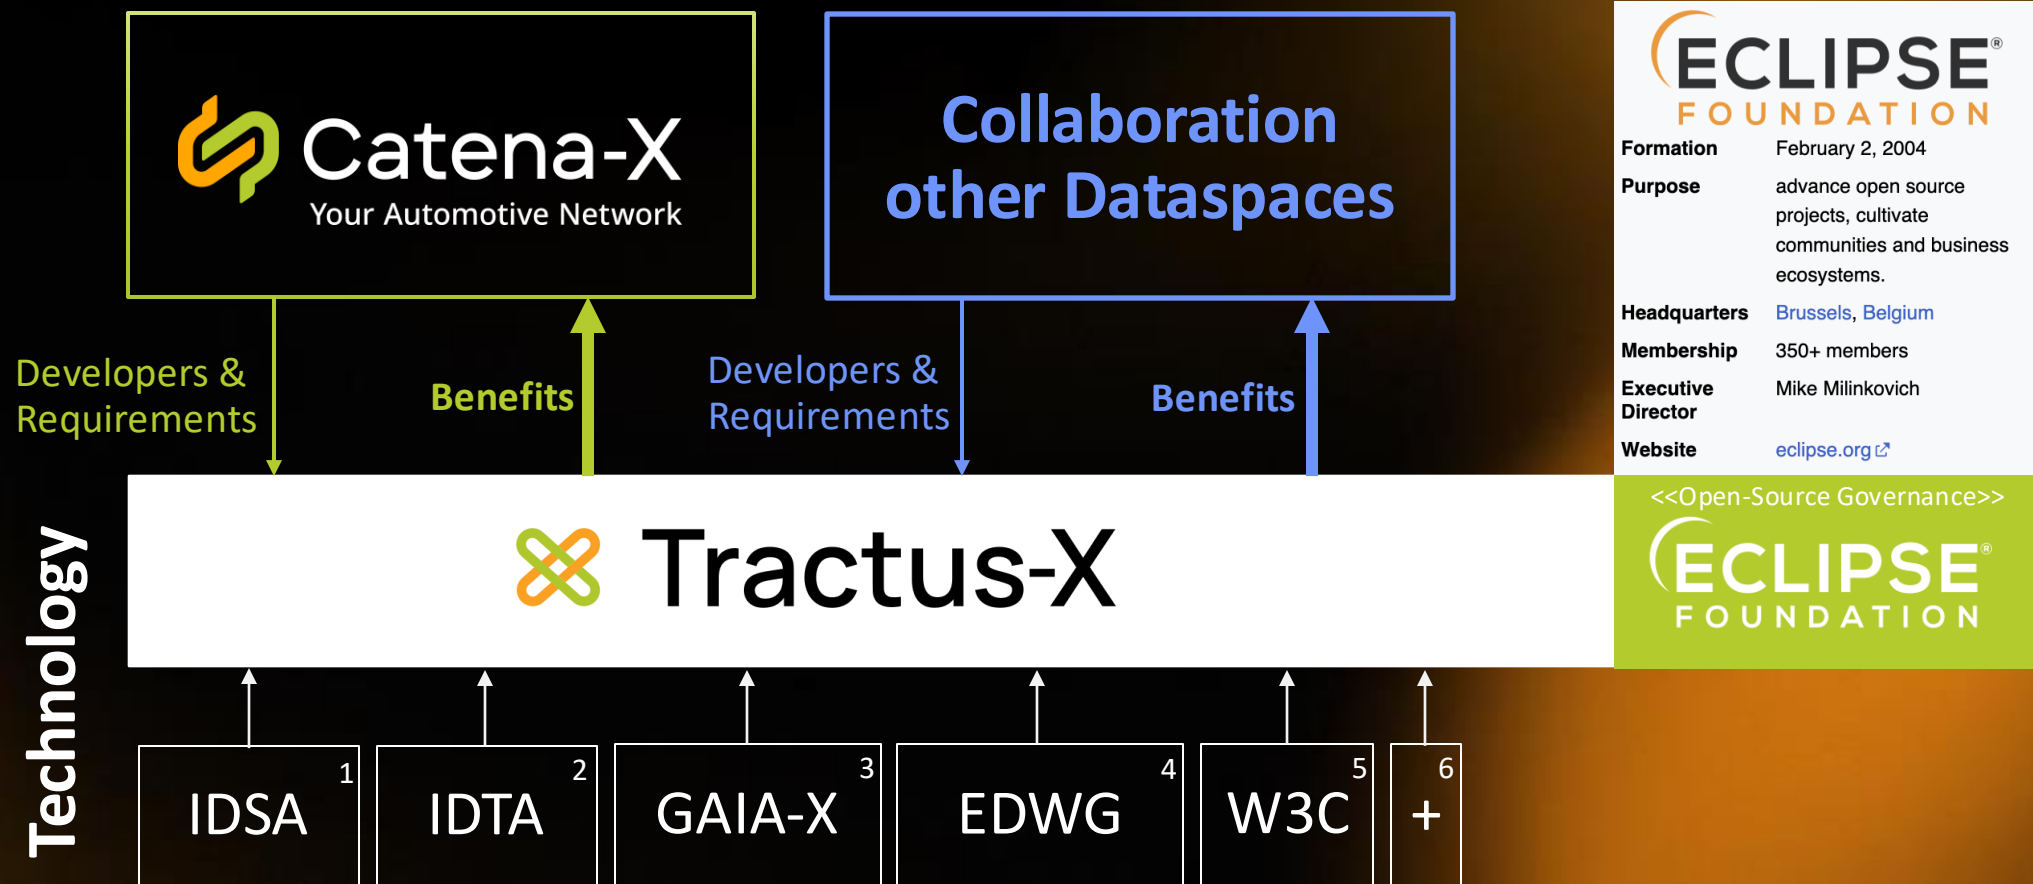

ZF is participating in 7 Use-Cases

- Traceability
- Sustainability
- Circular Economy
- Digital Behaviour Twin
- BPDM – Business Partner Data Mgmt
- Quality
- Demand & Capacity Management

To understand the architecture and core services, ZF also actively participated in the **Core Services** development.

Tractus-X – The Open Source base of Catena-X

1. International Dataspaces

2. Industrial Digital Twins

3. Data Sovereignty

4. Decentral Data Exchange

5. Secure + Web3.0

6. Innovative

Tractus-X Community Days | Stuttgart, May 22-23, 2025

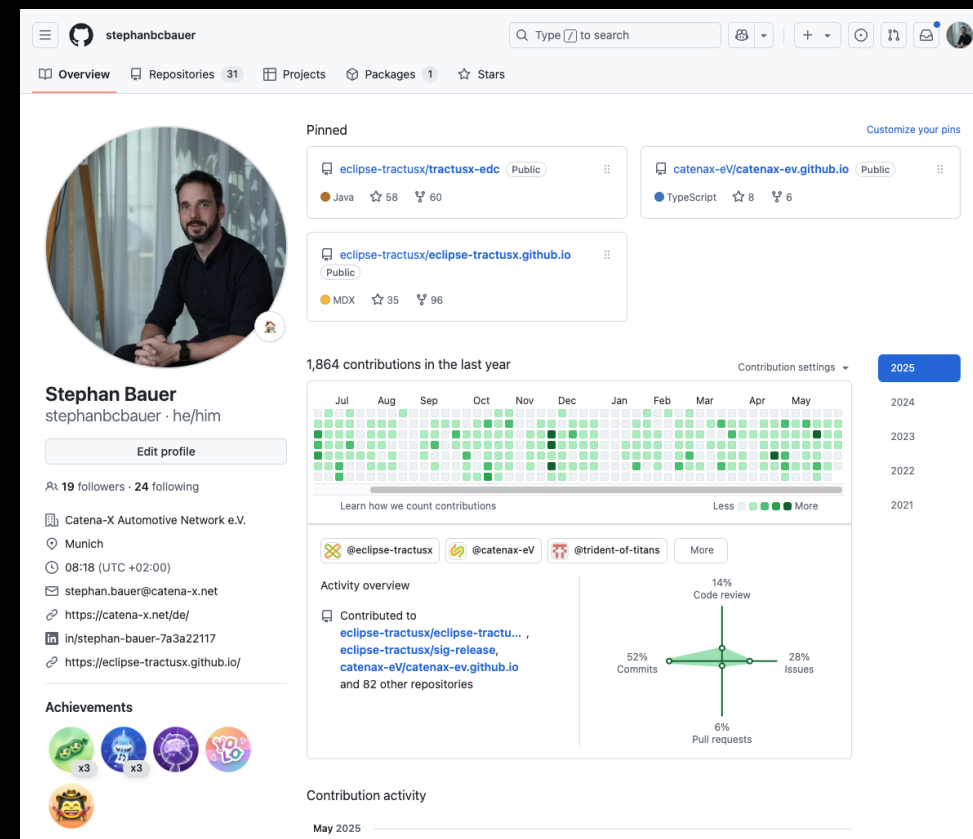

A Real-Life Report from the Eclipse Tractus-X Project

Radical Collaboration in Practice

Stephan Bauer – Project Lead, Eclipse Tractus-X

Stephan Bauer
Platform Domain Manager (Catena-X e.V.)
Project Lead (Eclipse Tractus-X)

Its all about the community

Why Open Collaboration Matters

Open Source as a Foundation

Break Silos, Build Together - enables cross-company collaboration by providing shared code, open governance, and transparent processes.

Shared code is shared success.

Trust Through Common Infrastructure

When everyone builds on the same open standards and infrastructure, it fosters interoperability, fairness, and trust — especially in federated environments.

Common ground builds trusted ecosystems.

From Control to Contribution

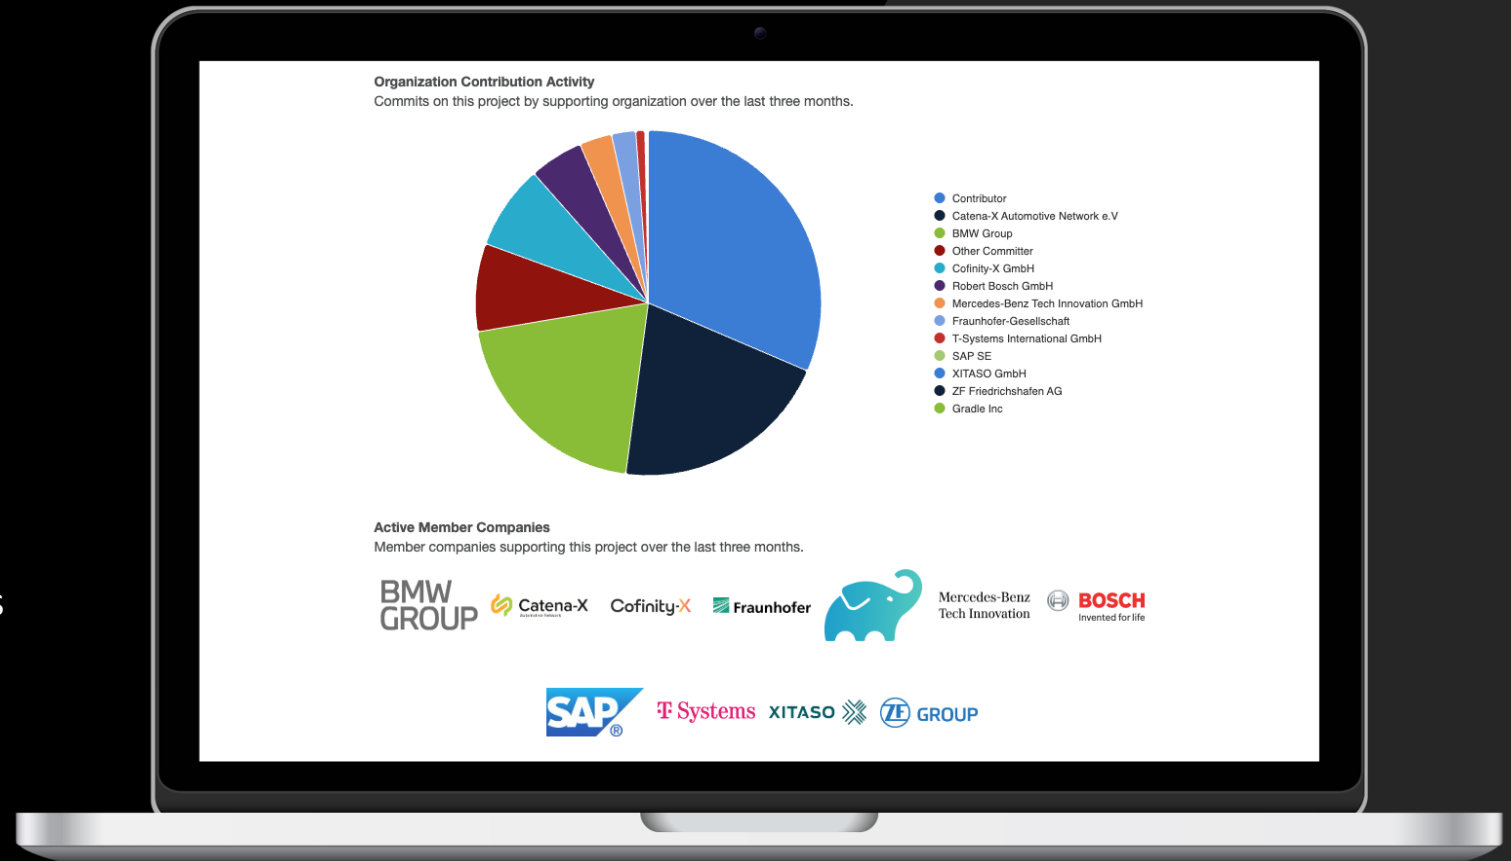

Moving from closed control to open contribution shifts the mindset. Everyone becomes a stakeholder — not just a user, but a builder.

Empower Through Participation

What Makes It Work: Success Factors

- ✂ Neutral governance (Eclipse Foundation)
 - ✂ Project Handbook
 - ✂ Development Processes
 - ✂ Ressources (GitHub ...)
- ✂ Transparency & openness
- ✂ Not only one company is involved
- ✂ Shared backlog & GitHub-based planning
- ✂ Real contributors from many companies
- ✂ Rituals: refinement, open planning, open calls

Roles in Eclipse Tractus-X

- ✂ **Contributor** – Anyone who proposes issues, makes pull requests, or contributes in discussions. -> No formal process.
- ✂ **Committer** – Can merge pull requests, manage issues, and steer development in a component. Responsible for quality -> Nominated by existing committers, approved via Eclipse vote process.
- ✂ **Project Lead** – Oversees the project, ensures governance, represents the project in the Eclipse Foundation. -> Must be an experienced committer, appointed through a formal process

Note: There are more tasks and duties described in the Eclipse Project Handbook

How to become a committer (in a nutshell)

[Eclipse project roles | Eclipse Tractus-X](#)
[\(eclipse-tractusx.github.io\)](#)

Get Elected

Nomination by an existing committer

Existing committers vote on the nomination.

If successful, you are accepted as a committer

Contribute

Regularly contribute to the project, such as through: Code contributions, Documentation, Bug reports, Tests

Contributions should be of high quality.

Show Commitment

Demonstrate **long-term commitment** through:

Continuous contribution,

Participation in discussions and decisions

Build Trust

Gain the trust of existing committers through:

Quality and reliability of your contributions,

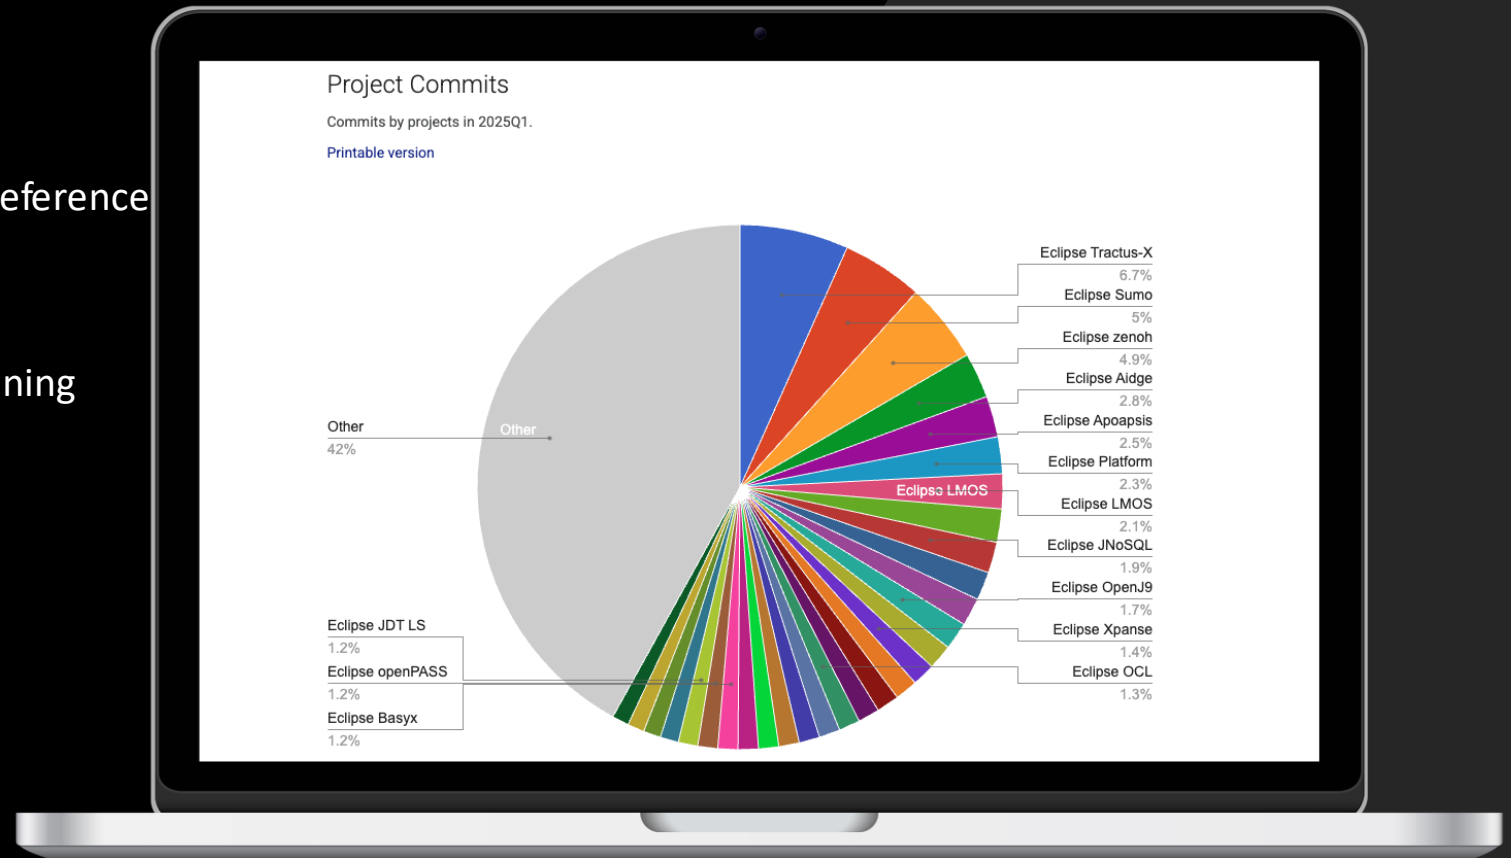

Effective collaboration with others

Eclipse Tractus-X at a Glance

- ✂ Still #1 Project → see the numbers
- ✂ Some “technical” Resources
 - ✂ 57 GitHub repositories → 23 products (reference implementations)
 - ✂ 4 releases per year
 - ✂ Open refinement/alignments/open planning
- ✂ The community behind
 - ✂ 200+ contributors (not all are coder)
 - ✂ 15 (out of 43) active committer
 - ✂ 311 subscription to mailing list
 - ✂ 8 regular open meetings per week
 - ✂ 2 Community Days per year (with more than 200 participants “on site”)

Note: There is not only one company behind and we are not a company – we are a community

The Working Model

❌ Open and Transparent collaboration with GitHub

❌ Timelines

❌ Projects/Boards & Milestones

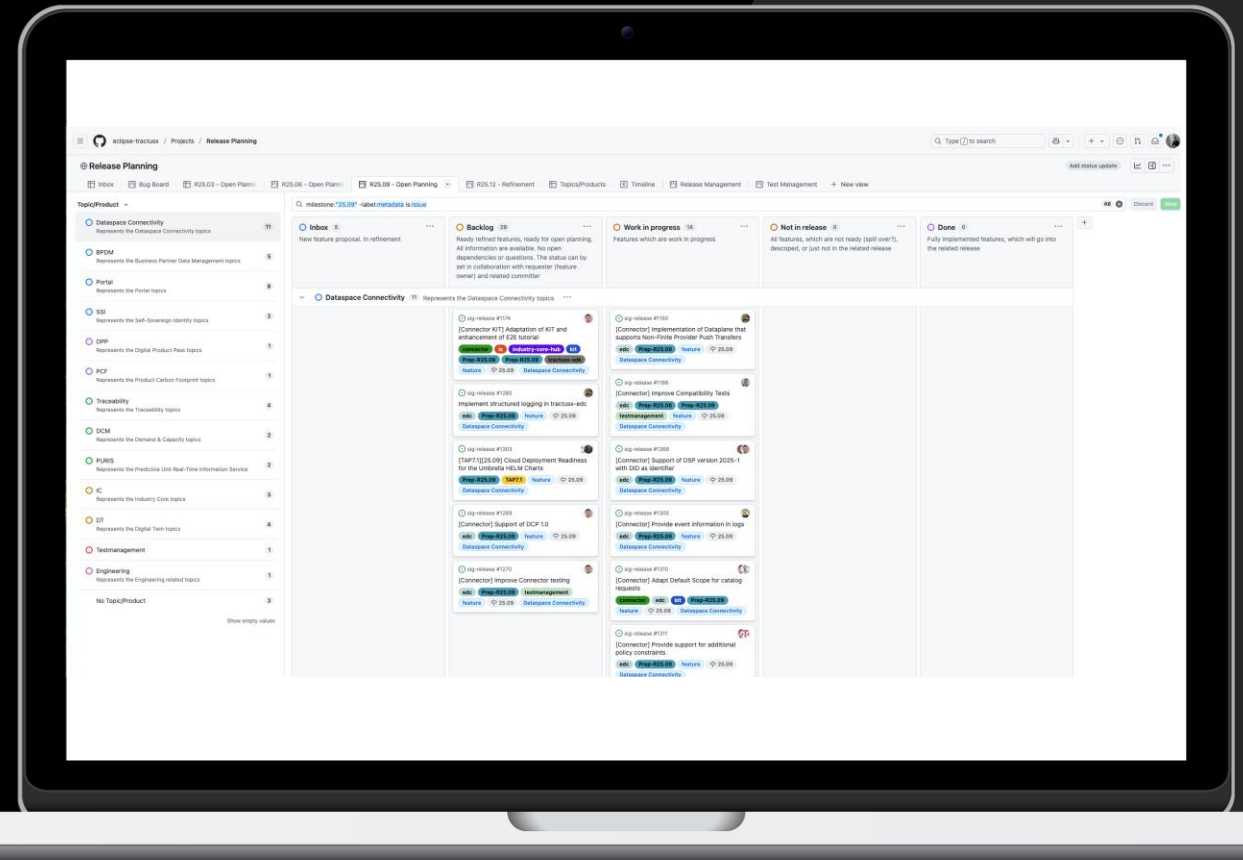

❌ Open Planning & Refinement

❌ Feature planning and alignment

❌ Communication/Discussions

❌ Documentation

❌ Development

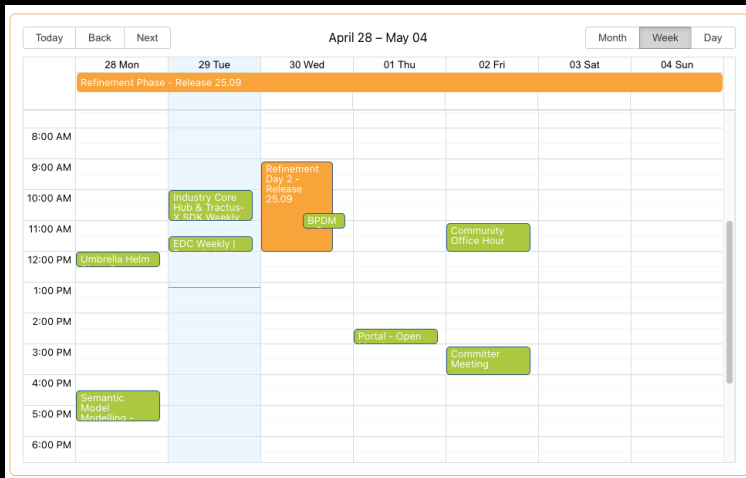

Note: Everybody (even without an account) can join and follow the progress

Tractus-X - Open Meetings

Committer Meeting

Every 2 weeks on Friday effective 16. Feb 2024 until 31. Dec 2024 from 02:05 pm to 03:00 pm CET

NewJoiner - Office Hour

Every 4 weeks on Friday effective 8. Mar 2024 until 31. Dec 2024 from 02:05 pm to 03:00 pm CET

Office Hour

Every Friday effective 16. Feb 2024 until 01:05 pm to 02:00 pm CET

Security - Office Hour

Every 2 weeks on Thursday effective 15. Feb 2024 until 31. Dec 2024 from 08:35 am to 09:30 am CET

- ✂ 6 regular open meetings per week, 5 open planning meetings every 3 month (with up to 160 participants)
- ✂ eclipse-tractusx.github.io/community/open-meetings
- ✂ Register to our mailing list: <https://accounts.eclipse.org/mailling-list/tractusx-dev>

We are Eclipse Tractus-X ...

- ✂ We are passionate for technology and innovation
- ✂ We share real innovation
- ✂ We are live
- ✂ We shape the future of the different industries
- ✂ We are the blue print for successful dataspace
- ✂ ... and we are a really great community

⌘ Developer

The image shows a computer monitor on a desk. The monitor screen is dark with a grid of dashed orange lines. In the center of the screen, the Tractus X logo is displayed, consisting of a stylized orange and yellow infinity symbol followed by the text "Tractus X" in white. The monitor is on an orange desk with various controls and buttons. In the background, there is a blurred image of a modern office or laboratory setting with white walls and blue accents.
